Birthday Spotlight

Ray Dales, Instructor
Cisco Networking

How long have you been employed at Dalton State, and what are your job responsibilities? I've been here for almost two years. I am a full-time instructor in Networking and Service Technology, and I serve as the Institutional Effectiveness Coordinator for the School of Technology.

As the countdown to fall semester begins, Office of Enrollment Services staff members practice their smiles and pause for a picture on the tower steps.

(Continued on page 2)

Campus Watch

Davis

Ms. Donna Lee Davis, Assistant Director of Student Activities, graduated from the Dalton-Whitfield Chamber of Commerce's Emerging Leaders Institute in May. The goal of the Institute is to provide each participant with a foundation of basic leadership skills and knowledge. The curriculum, which was developed by the Fanning Leadership Institute at the University of Georgia, is designed to develop knowledgeable, skilled, committed, and action-oriented leaders. Twenty-five young professionals employed in Dalton and Whitfield County are selected for participation in the program each year.

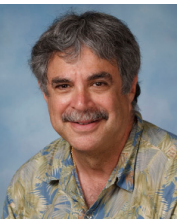

Price

During May, **Dr. Christy Price**, Professor of Psychology, presented faculty development workshops on her millennial learner research at the University of New Brunswick, New Brunswick, Canada, and at Susquehanna University in Pennsylvania. During June, she presented on millennial learners at the International Conference on the First-Year Experience in Maui, Hawaii, and as the keynote address for the Transforming Perceptions Conference for Educators in Billings, Montana. Also in June, Dr. Price presented her research to the University System of Georgia Academic Advisory Committee on Nursing, which met at Clayton State University on the 21st.

Wimmer

Assistant Professor and Child Welfare Specialist **Dr. Jane Wimmer** and Dean of the School of Social Work **Dr. Spencer Zeiger** have been invited to present at the Georgia National Association of Social Workers' annual conference in Atlanta this fall. Dr. Wimmer will speak about the role of Dalton State College Social Work students in helping children to heal from the traumatic grief of the death of a parent, and Dr. Zeiger will present "Working with Difficult Coworkers."

Zeiger

Funded by a grant from the Board of Regents, Dalton State held its fifth annual Mathematics Summer Institute for Teachers recently at the Whitfield County Career Academy. Twenty-four area teachers participated this year, devoting five days to improving their own skills for the benefit of their students. Pictured are Ms. Sally Burran, left, and Dr. Sue Phelps, Math Consultants for the Institute. Not pictured is Dr. Mary Edwards, Project Director.

Dales (continued from page 1)

What do you like best about your job? I like everything about this job. I tell everyone that I know that teaching at the College is the best job in America.

What do people on campus not know about what you or someone in your position does? When I was a student here, I had no concept of how much work goes into teaching a course, much less teaching four or five, on top of advising and other responsibilities.

Age on this birthday? I will be cresting the hill, the big FOUR OH.

Where did you grow up, and where have you lived? My father was a career soldier, so I moved my entire life, living in some places twice, until landing in Dalton. I was born in Virginia and have lived in Germany, Okinawa, Belgium, Kentucky, Ohio, Pennsylvania, South Carolina, Texas, and Georgia.

Whom do you call family? My wife, Martha, daughters Michelle (20), Grace (11), and Zoe (8) and my son Jesse (17).

That of which you are most proud? I am very proud of being a first-generation college student, having completed an MBA, and being accepted to a doctorate program starting this fall.

Did you have a favorite subject in graduate school? Yes. Strategic Management.

What do you like to do in your spare time? I enjoy playing with the family, working out, practicing Tae Kwon Do, throwing darts, riding motorcycles, and tinkering with gadgets.

Do you have a favorite book or author? W.E.B. Griffin.

If you were stranded on a desert island and could only take one item, what would it be? A satellite phone with built-in GPS (so I could call for help and tell them exactly where I was stranded).

If you weren't working here, what would you be doing? I would be working with technology in some capacity while trying to get a job here.

When I retire, I will... Live on a beach, play with grandkids (hopefully, I'll have some by then), and ride motorcycles.
